PROFESSIONAL SUMMARY

Full-stack and mobile developer with 2 years of professional experience building and shipping production web and mobile applications with React, TypeScript, React Native (Expo), Capacitor, Supabase (PostgreSQL), Node.js and FastAPI. Core contributor to a multi-tenant SaaS engagement platform with real-time multiplayer features, Stripe payments and serverless Edge Functions, load-tested for up to 10,000 concurrent users. Published an Android app on Google Play and delivered client websites and apps end to end, from requirements to deployment. Open to freelance and contract roles.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, HTML, CSS, Dart
- **Frontend:** React, Redux, React Router, Vite, Tailwind CSS, shadcn/ui, Material UI, TanStack Query, Framer Motion, GSAP, i18next, Responsive Design, Web Accessibility (WCAG)
- **Mobile:** React Native, Expo, EAS Build, Capacitor (iOS and Android), Flutter, Push Notifications, Google Play publishing
- **Backend and APIs:** Supabase (Auth, Row-Level Security, Realtime, Edge Functions), Node.js, Express, FastAPI, Flask, REST APIs, Swagger/OpenAPI, Webhooks, JWT and OAuth authentication, Role-Based Access Control (RBAC), Cloudflare Workers
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase (Auth, Realtime Database), SQLAlchemy
- **Payments and Integrations:** Stripe, Shopify, Shiprocket, SendGrid, EmailJS, Telegram Bot API, Google Sheets API
- **AI and Automation:** OpenAI API, Groq (Llama), LLM integration, AI agents, web scraping and automation (Selenium, BeautifulSoup, selectolax)
- **Testing and DevOps:** Playwright, Selenium, k6 load testing, Jest, Vitest, GitHub Actions (CI/CD), Docker, Google Cloud Run, Firebase Hosting, Netlify, Vercel, Render, Git, Postman, Lighthouse CI, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Xtrasmatrix Consulting Private Limited (XTMX) **Nov 2024 – Present**

- Joined as the company's first developer and built the company website and careers portal from scratch across two versions (90+ commits) with React, TypeScript, Tailwind CSS and Firebase: services, industries, case studies, a job portal and admin dashboards.
- Built a FastAPI and PostgreSQL (SQLAlchemy) API for job applications with resume upload, email notifications and Swagger/OpenAPI documentation.
- Developed the AI Tank learning-community platform (courses, events, admin) and its FastAPI and MongoDB authentication service with email OTP sign-up and password reset.
- Set up CI/CD deployment pipelines, domains and environment configuration, production monitoring, bug fixes and performance optimisation.
- Turned client and stakeholder requirements into production features, established the team's Git workflow and deployment process, and onboarded new developers.
- Wrote Python scrapers (Selenium, requests, selectolax, pandas) with retry logic to extract product-catalogue data into JSON and CSV.

Freelance Full-Stack & Mobile Developer | Self-employed **Mar 2025 – Present**

- Deliver client websites and mobile apps end to end, from requirements and design to deployment and handover.
- Built and published PRSTC Hostel on Google Play solo: a React Native (Expo) and Supabase app for attendance, meals, complaints and notices, with push notifications, Google Sign-In and CI-built APKs.
- Rebuilt the Hotel Winsar Park website with a Supabase admin CMS for rooms, dining, banquets and enquiries; an image-optimisation pipeline fixed a 126 MB gallery page.
- Built websites for EpicQ, an Agile training firm, and Darshan Singh Choudhary, a bilingual English and Hindi site using i18next.

KEY PROJECTS

- **Knowsy – knowsy.game and Knowsy Knows (Lead Full-Stack & Mobile Developer):** Real-time multiplayer social ranking game and multi-tenant brand-engagement platform for a US-based client, built with React 19, TypeScript and Supabase (PostgreSQL, Row-Level Security, about 70 Edge Functions, Realtime).
  - Built the Konnect real-time party game (lobbies, ranking rounds, host hand-over), AI topic suggestions and Capacitor iOS and Android apps (680+ commits on Knowsy Knows).
  - Integrated Stripe checkout and webhooks, Shiprocket shipping, a Shopify store proxy on Google Cloud Run and OpenAI-powered AI players, and built a white-label version for third-party brands.
  - Built real-browser load tests with Playwright and k6 for 10 to 10,000 concurrent users with p50, p95 and p99 latency, and set up Playwright end-to-end tests.
  - Shipped versions 1.2 and 1.3 of the earlier Flutter app (Firebase Auth, Realtime Database).
- **UCO Hub (Android app and web console):** Expo and React Native app plus a React web console on a shared Supabase data model for a used-cooking-oil collection business, with three user roles, a full collection lifecycle, CSV export and custom SVG charts.
- **Expenses AI Agent:** Python Telegram bot that reads receipt photos with a Groq Llama vision model and logs expenses to Google Sheets, deployed on Render with Flask webhooks.
- **GammaWealth:** React 19, TypeScript and Tailwind CSS website for an AMFI-registered mutual fund distributor, with a risk-profiler quiz, JSON-LD SEO and GitHub Actions preview deploys to Firebase Hosting.
- **D-CoE IISc website:** Responsive React website for an IISc design and innovation initiative covering courses, facilities and events, structured so non-technical staff can update content easily.
- **Developer Portfolio:** React, TypeScript, Vite and Tailwind CSS v4 site scoring 100 on Lighthouse for accessibility, best practices and SEO, with Netlify Forms and a CI pipeline for lint, dependency audit and Lighthouse checks.
